ACCOUNTING

At Provincial Accounting, our passion for providing service to primary producers means we cover large areas of rural NSW and Victoria. We understand farmers and agribusiness and when asked, we love to come out and meet with you at your property.

Part of your rural community.

Since the firm first began operating we have focused heavily on services to the rural sector. Today, primary producers remain one of Provincial Accountings' largest client groups.

Farm accounting involves specific business, financial, and taxation issues, and as such requires a specialist understanding of the industry. It also requires people who talk on your terms. At Provincial Accounting we keep abreast of the developments in agribusiness, putting us in a position to provide you with up-to-date and accurate advice. We understand the challenges faced by primary producers throughout regional areas and ensure our rurally based clients receive timely advice, whether simple or complex, regardless of their location.

We want to empower our rural clients with the best information to achieve a profitable and sustainable business. We are experienced in implementing business strategies specifically targeted to the agribusiness industry, and offer farm planning and enhanced farm management reporting.

Development of comprehensive succession, retirement and superannuation plans should be built into any agribusiness strategy, and these are areas at which we excel.

Agribusiness solutions that work.

Obviously, we take care of all the regular accounting, tax and GST services.

Our services to you include:

- Preparation of tax and financial statements
- Seasonal planning
- GST Compliance
- Agri-Business advice and consulting
- Taxation planning for large farming groups
- Restructure of family farming operations
- Succession and Estate planning advice
- Applying for government assistance
- Business planning, wealth creation, budgeting, cashflow and debt management
- Assistance in identifying and implementing short, medium and long term goals.

Provincial Accounting provides innovative and effective tax and business planning advice to our rural clients. We intend to maintain our lead in this area.

Ultimately we want to build a relationship with you, your family and your business that lasts generations.
